Insights:

Some categories generate high revenue but lower profit margins, indicating potential pricing inefficiencies.

- Revenue trends show strong seasonal spikes, suggesting promotional opportunities during peak months.
- High-volume categories should focus on margin optimization instead of aggressive discounting.

Recommendations: • Reduce discounts on already high-selling products, • Focus promotions on high-margin categories, • Introduce combo meals and product bundles .

Insights: Certain products generate strong revenue but weak profit margins, indicating excessive pricing pressure or discounting.

- High-volume categories contribute significantly to sales but not always to profitability.
- Customer ratings suggest that some premium products maintain both high satisfaction and strong profitability.

- Recommendations:**
- Increase prices slightly for high-demand low-margin products.
 - Promote high-margin products more aggressively.
 - Reduce discounts on products with stable demand.
 - Create combo bundles using high-rated products

Insights: Higher discount levels increase sales volume but significantly reduce profit margins.

- Some categories lose substantial revenue through excessive discounting without meaningful growth in units sold.
- Several products maintain stable demand even with low discounts, indicating pricing optimization opportunities.

Recommendations: Limit discounts to high-inventory or slow-moving products.

- Reduce discounts on high-demand products with stable sales.
- Use combo offers instead of deep price cuts.
- Focus promotions on high-margin categories.
- Avoid discounts above 20% whenever possible.

INsights: Several products maintain strong customer ratings despite low profit margins, indicating opportunities for moderate price increases.

- High-volume categories should focus on margin optimization instead of aggressive discounting.
- Premium and highly rated products contribute disproportionately to profitability and should receive stronger promotional focus.

Quick Wins:

- Reduce discounts on high-demand products.
- Promote high-margin products on the app homepage.
- Introduce combo meal bundles.
- Optimize pricing for low-margin bestsellers.

Long-Term Strategies:

- Implement dynamic pricing based on demand trends.
- Use customer behavior analytics for personalized promotions.
- Expand high-margin product categories.
- Build category-level pricing optimization models.
